Feral Cat Sterilization Service

- All participants must complete and sign the *Feral Cat Sterilization Agreement*.

- Cats must be in a **humane cat trap** covered by a towel, which is greatly important to reduce the stress on these animals.

- All cats will have an ear notch for easy identification of outdoor sterilized cats.

- Cats must be dropped off between 10 pm the night before surgery and 8 am the day of surgery.

- Cats must be picked up 6 – 10 pm the day of surgery.

- Fees are due at the time of admittance: **surgery & microchip is $25**.

The Humane Society encourages timely drop off and pick up of animals using this service. As a high-volume shelter with limited space, it needs to be able to accommodate more than 70 animals that are arriving daily. We appreciate your understanding and support of our rules and procedures.

__________________________________________

If you are unable to pick up your cat, call our Admissions Department at 356-2285. Cats left unclaimed 24 hours after surgery will be admitted into the shelter as abandoned. Additional fees may apply.
